

AI IN PRODUCTION

International Conference for
AI Solutions in Production

SAVE THE DATE

Hanover, Germany
24/25 September 2019

WHAT TO EXPECT AT THE CONFERENCE

- Networking at an exclusive pre-evening dinner event, including talks and a panel discussion
- Inspiring talks, keynotes and break-out sessions
- „Learning from the best” – how AI is transforming production

ORGANISER

IN COOPERATION WITH

Deutsche Messe
Technology Academy

ATKearney

The age of artificial intelligence has dawned and many companies are already using self-learning and semi-autonomous systems. AI will become the decisive global competitive for manufacturing companies.

The AI ^{IN} PRODUCTION conference is aimed at all those responsible for production in all industries planning to convert AI into technical reality in an economically viable way. Find out - beyond buzzwords - what is possible today and what will be possible tomorrow. Discuss opportunities and risks with the experts.
