**BearingPoint**

BearingPoint Industrial Internet of Things Starter Package

BearingPoint will quick-launch your Industrial Internet of Things (IIoT) strategy. We transform sensor signals & swarm intelligence into business value.

With the **Industrial Internet of Things Starter Package**, BearingPoint offers a quick-launch solution to connect machines to the cloud and visualize their condition in a central cloud dashboard. By combining sensor data with context information provisioned by the swarm intelligence of your workforce, BearingPoint helps you unlock the real potential of IIoT.

Hardware	Cloud
• 1x CloudRail.Box • 1x IO Link Master • 1x IIoT Vibration Sensor • 1x IIoT Temperature & Humidity Sensor	• Microsoft Azure Subscription (3 months) • Microsoft Azure IoT Central • CloudRail Device Management Subscription (3 months)

Service

- Ready-to-use hardware installation and set up
- Microsoft Azure cloud integration and configuration
- Ready-to-use Microsoft Azure IoT Central Dashboard
- Ready-to-use IIoT swarm intelligence forms
- Workshops to define your individual IIoT roadmap

9,950 Euro
(excl. VAT)

Your Benefits

- **Easy-to-use.** Bring your project up to speed with rapid hardware installation, cloud integration and visualization
- **Sensor monitoring.** Live visualization of the machine vibrations – implemented in just hours
- **Condition monitoring.** Real-time tracking of your production equipment – automatically identify machine downtime
- **IIoT Swarm.** Leverage the swarm intelligence of your workforce together with sensor data and artificial intelligence
- **Expert consulting.** Benefit from BearingPoint's holistic cross-industry consulting experience

Our experts are ready to support you with your IIoT journey. Please contact our IIoT experts today.

Machine → Sensors → Gateway → Cloud → Dashboard → Business Value
